ASHH Diversion Program

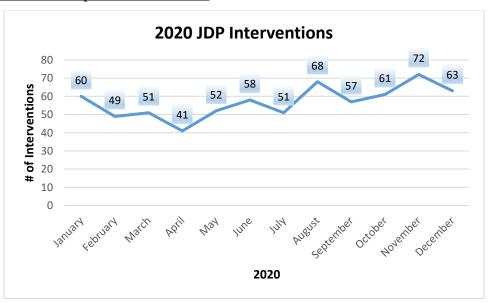

2020 Annual Report

The ASHH Jail Diversion Program (JDP) was launched in 2015 and pairs specially trained crisis clinicians from Advocates Inc, with police officers at the Ashland, Sherborn, Hopkinton, & Holliston Police Departments. These embedded clinicians respond to calls for service and 911 calls with patrol officers; providing immediate on-scene de-escalation, assessment, and referrals for individuals in crisis. The primary goal of the ASHH-JDP is to re-direct individuals committing non-violent offences out of the criminal justice system and into more appropriate community based behavioral health services. When a JDP clinician is not on duty, the Advocates Psychiatric Emergency Services (PES) team supports the JDP clinician to ensure timely access for the participating police agencies 24/7.

JDP Interventions

On-scene crisis interventions are facilitated through the dual response of police and clinician to calls for service involving individuals in crisis. Chart 1 represents the 683 individuals referred to the ASHH Jail Diversion Program clinician (s) by ASHH police officers in 2020.

Chart 1: ASHH Co-Response Interventions

Diversions from Arrest

The primary goal of the ASHH Jail Diversion Program is to divert low-level offenders away from the criminal justice system and into more appropriate, community-based behavioral health treatment. In 2020, a total of thirty-eight (38) individuals with behavioral health conditions were diverted from arrest by ASHH police officers and into treatment facilitated by JDP clinicians. The average percentage of those eligible for arrest diversion who were diverted is 67%. Chart 2 represents the percentage of diversions from arrest by month.

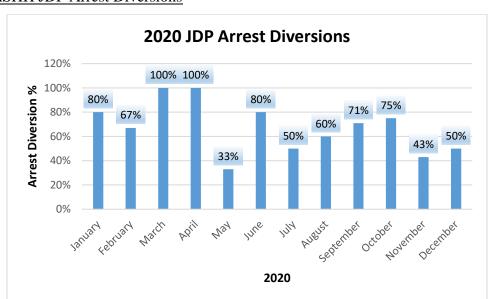

Chart 2: ASHH JDP Arrest Diversions

In addition to the benefit of diverting individuals in crisis from arrest, these diversions represent an *estimated* cost savings of \$95,760* to the criminal justice system (\$2,520 per arrest event).

Diversions from the Emergency Department

A secondary goal of the ASHH Jail Diversion Program is to decrease the frequency of individuals with behavioral health conditions being referred to the hospital emergency department (ED) for psychiatric assessment by ASHH police officers. During 2020, seventy-one (71) individuals were

diverted from unnecessary hospital admissions due to the presence of a JDP clinician on scene; to facilitate assessment treatment recommendations. Chart 3 represents the monthly hospital ED diversions facilitated by the ASHH JDP team.

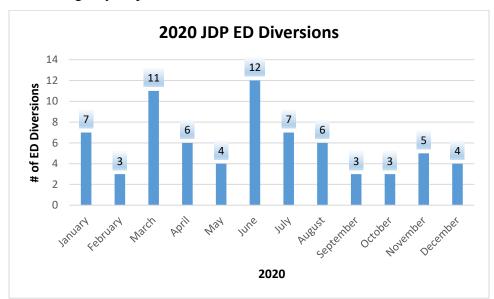

Chart 3: ASHH Emergency Department Diversions

In addition to the benefits of receiving care outside of the hospital, these emergency department diversions represent *estimated* health care cost savings of \$284,000* (\$4,000 per ED diversion). Combined, estimated cost savings due to arrest and emergency department diversion activity equals \$379,760*. Thank you for another year of partnership!
